Modify Linewidth

1056 GstarCAD Malaysia June 30, 2021 <u>Unique function</u>   0 3960

Modify the line width you specified, if what you specified is a line and our software will convert the line to Pline automatically and change the line width. This function is similar to the pedit function, we can use it as a shortcut version and it is very convenient for modifying the line width.

Menu: Express > GstarCAD Tools > Modify Linewidth
Command Entry : LCW

 Operation steps:

1.Start the command.

2.Select the line, as shown below.

3.Enter a new line width value and here we input "2" for example.

4.Enter to finish and the effect will be as below.
