How to get high resolution Image from GstarCAD?

1123 GstarCAD Malaysia April 3, 2016 Tips & Tricks 0 5886

Do you need to create a high resolution image from lines, arcs and other objects in your drawing? No, this is not about rendering. Just you can just plot your model/layout.

Try to open your plot dialog box. You can see a plotter namedPublishToWebJPG.pc3. Use it, you will get a JPG image with fair quality.

Page Setup					Plot style table (pen assignments)

Plot offset (origin set to printable area)			1.0000	Mineters	٠	1	Drawing orien	ation		
X 11.550	Milmeters _ Center the plot		318.7814 gnits		Potrat Landscape					
-13.650	0 Milmeters	Scale Ineweights					Plot upside-down			

JPEG probably is the most popular image format for presentation. But if it's still not good enough... How about BMP, TIFF, or TGA? You can add more plotters for those file types. Under Printer/Plotter, you will see the Add Plotter option. Click to open it. This will bring you to a wizard window, follow the steps:

- 1. Click next at the first page.
- 2. On the next page, select My Computer. Then click next.

Begin Network Plotter	To configure a new plotter, select one of the following:					
System Printer Plotter Model Select Driver Import Pop or Pc2	My Computer All settings will be configured by an GatarCAD plotter driver, and managed by this computer.					
Pots Pots Potse Name Pinish	Network Plotter Server All settings will be configured by an GistarCAD plotter driver, and managed by a plotter server. System Pinter Use a configured Windows system printer driver, and apply different default values for GistarCAD 2010 vs. other Windows applications.					
	< Back Next > Cancel					

3. On the next page, you can see a list of manufacturers, and the models. We want to add TIF this time.

4. Select Raster File Formats as manufacturers. Then select TIF option as plotter model.

Start Network Plotter Souteen Direter	Select your plotter manufacturer and model. If your plotter ian't lated, consul plotter documentation for a compatible plotter.	your
Plotter Model Select Driver Import Pop or Pc2 Pots Plotter Name Finish	Optionally, if you have an installation disk containing an HDI driver, choose Disk. A Browse for HIF File dialog box is displayed for you to locate and inst HIF file attached to the HDI driver. Manufacturers Manufacturers Models EMF 1.0 GiF JPEG 1.0 PEG 1.0 TER	Have all the
	Supported format of this type 3cad Raster TIFF.1.0 - Have Dak	

You can also select BMP if you like. Now, you can simply click next and finish through the rest of this wizard. Open your GstaCAD, open plot dialog box. You should see your new plotter there!

Use them to create your image. You should be able to get high quality image from your drawings.
