

How to convert a dwg file to pdf with added layer information?

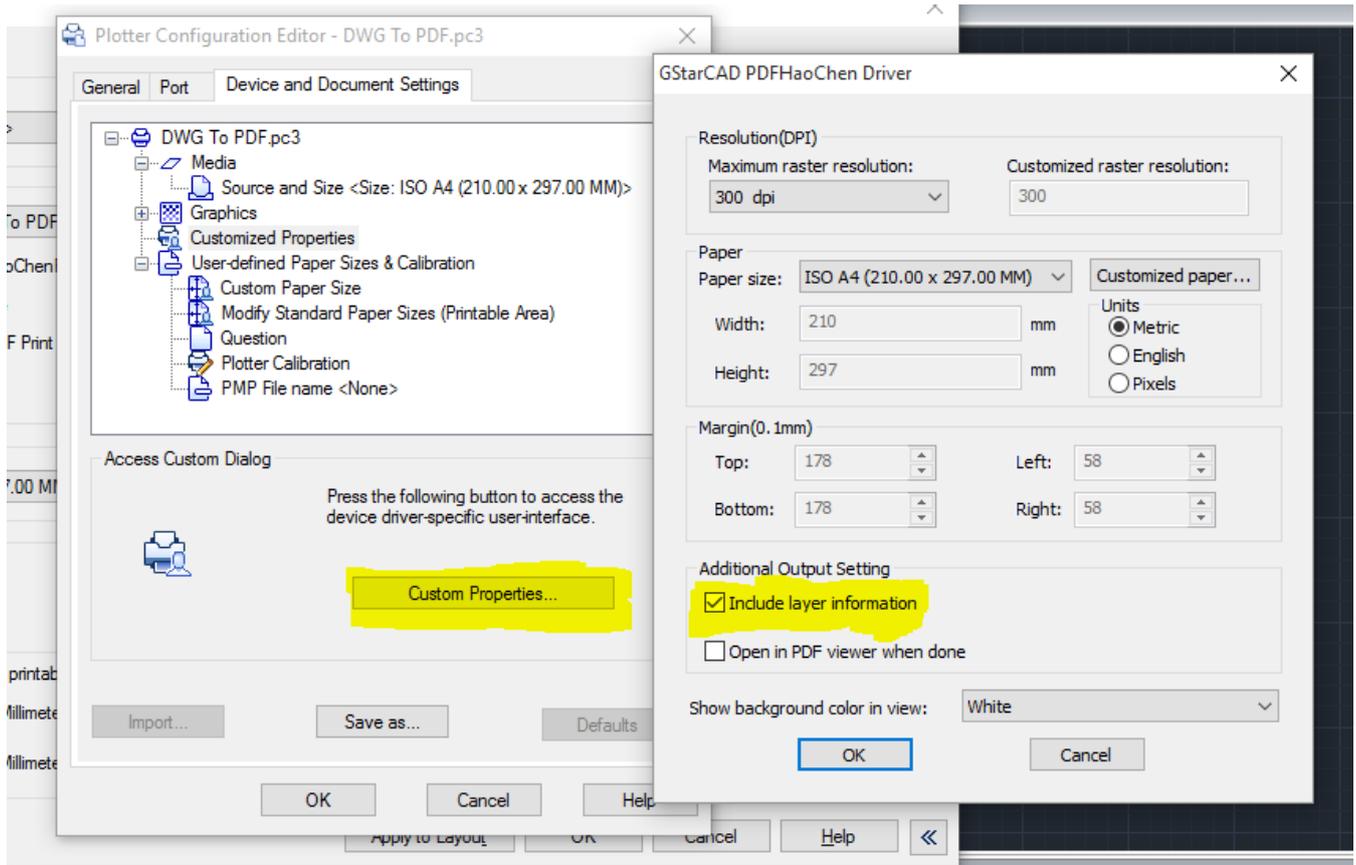

1139 GstarCAD Malaysia April 14, 2016 [Tips & Tricks](#) 0 9389

At plot model dialog box choose **DWG to PDF.pc3** as the printer/plotter name.

Configure your desired options, such as Paper size, Plot area, and Plot scale.

Click **Properties > Custom Properties**, in the **Additional Output Settings** category choose **Include layer information**.
