How to force delete any unwanted layers ?
1163 GstarCAD Malaysia May 5, 2016 Tips & Tricks   0 5130

When PURGE command failed to remove any unreferenced layers.

When deleting any unused Layers in Layers Properties manager, this message will prompt out;

The solution is by using **LAYDEL** command,

1 : Type **LAYDEL > ENTER**

2 : Select the entity on the unwanted layer to delete. *This will delete the Layer and all the entities which are assigned to it.*

3 : or Type **N > Enter**

This will prompt you a dialog box with the entire Layers name. Select the unwanted layers and click **OK**.
