

How to set a previous file version as default?

1224 GstarCAD Malaysia June 30, 2021 [Setting / Configuration](#) 0 3298

You can set to save drawing files to older or newest file format version, by default. You can access it in option dialog box, on open and save tab, under File Save option. Also, in the Save drawing as dialog box, select options and change the default to lowest or newest file format version so the other users can open it.
