Launch and run the GstarCAD2021_XXXX .msi (or the GstarCAD2021_XXXX.exe) and follow the installation wizard instructions. (**Download** the installer > **Run as Administrator**).

30DAYS TRIAL: GstarCAD trial version has 30 days fully functional evaluation period. After the evaluation period, some cad functions (e.g., save, export, and copy-paste) will be limited.

32BIT & 64BIT: GstarCAD 32bit and 64bit can't be installed on the same computer.

MULTIPLE VERSIONS: Installing GstarCAD does not install over older major versions of GstarCAD; multiple versions of GstarCAD can be installed on the same computer, but if you do, don't need the older versions, uninstalling those versions makes a tidier computer.

TRANSFER LICENSE: Activated (soft encryption type) single-user licenses are “locked” to the machine you licensed GstarCAD. If you purchase a new machine and want to transfer your GstarCAD license to that new machine, you will need to return your license from your old machine.
