

## **BPARAMETERFONT system variable**

1351 GstarCAD MY /KW July 8, 2021 [System Variables](#) 0 2331

### **Function Description:**

The **BPARAMETERFONT** system variable is used to set the font used for parameters and actions in block editor.

**Type** : Strings

**Saved in** : Registry

**Initial value** : Arial

Users could specify either a True Type font or a SHX font (such as Verdana or Verdana.ttf). They must add the .shx extension to a font. When specifying an Asian Big Font, using the following naming convention: an SHX file followed by a comma, followed by the Big Font file name(such as txt .shx, Bigfont .shx).
