DIMATFIT system variable

1427 GstarCAD MY /KW July 12, 2021 [System Variables](#) 0 921

Function Description:

The **DIMATFIT** system variable is used to control the text and arrows alignment method when the extension line space is not sufficient to place them.

Type : Integer
Saved in : Drawing
Initial value : 3
Range : 0,1,2,3

System Variable Value:

0 : place the text and arrows outside of extension line
1 : move arrow outside of extension line, and then move text
2 : move text outside of extension line, and then move arrow
4 : move either text or arrows, whichever fits best
