

# GRIPS system variable

1598 GstarCAD MY /KW April 14, 2022 [System Variables](#) 0 1673

## Function Description:

The **GRIPS** system variable is used to control the display of grips in selected objects.

**Type** : Integer

**Saved in** : Registry

**Initial value** : 2

**Range** : 0,1,2

## System Variable Value:

**0** : hide grips

**1** : display grips

**2** : display middle point grips on polylines

Please use the **GRIPSIZE** system variable to set grip size and valid selection range for cursor when snap grips.
