

SSMSHEETSTATUS system variable

1840 GstarCAD MY /KW July 27, 2021 [System Variables](#) 0 924

Function Description:

The **SSMSHEETSTATUS** system variable is used to control refresh method for status data in sheet set.

Type : Integer

Saved in : Registry

Initial value : 2

Range : 0,1,2

The drawing status data includes whether the drawing locked or not, missed or not, or found unexpectedly. This status data could auto refresh for all drawings.

Use the Refresh Sheet Status button on the Sheet List tab of the Sheet Set Manager to refresh the sheet set manually.

System Variable Value:

0 : do not refresh status data automatically

1 : refresh status data when loading or updated the sheet set

2 : refresh status data when loading or updated the sheet set, or by the time interval set by SSMPLLTIME
