

# ACISIN command

1950 GstarCAD MY /KW July 30, 2021 [CAD Commands](#) 0 844

The **ACISIN** command is used to import ACIS files and create 3D solids, bodies or region objects.

## Command Access:

**Ribbon** : Insert > Import > Import > ACIS

**Menu** : Insert > ACIS Files...

**Command** : ACISIN

## Function Description:

Inputting ACISIN in command line, the "Select ACIS File" dialog box pops up, select the file to be imported, the SAT (ASCII) ACIS file could be imported in drawing. Note: The ACISIN command could only import version of ACIS 7.0 or much lower version of SAT file.
