

# BLOCK command

2002 GstarCAD MY /KW April 15, 2022 [CAD Commands](#) 0 1634

The **BLOCK** command is used to create a block definition for specified object.

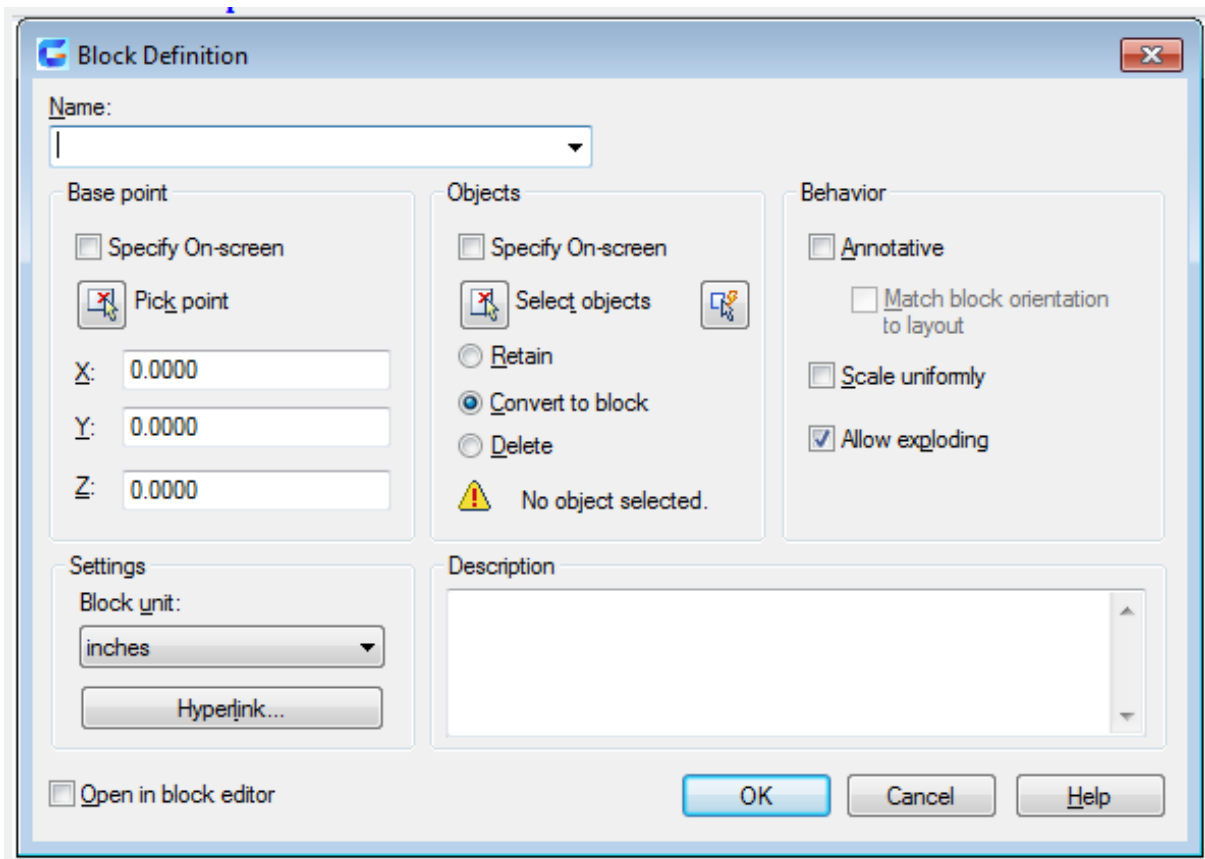

## Command Access:

**Ribbon** : Home > Block > Make...

**Menu** : Draw > Block > Make...

**Command** : BLOCK (display Block Definition dialog box), -BLOCK (display command line prompts)

## Function Description:

Users could create a block definition by selecting objects, specifying its base point, and giving it a name. Inputting "-block" under the command prompt, it will display options.
