

BLOOKUPTABLE command

2007 GstarCAD MY /KW August 4, 2021 [CAD Commands](#) 0 1018

The **BLOOKUPTABLE** command is used to display or create a property query table for specified dynamic block definition.

Command Access:

Command : BLOOKUPTABLE

Command Prompts:

Select Lookup Action:

Function Description:

When specifying a lookup action to a lookup parameter, the "Property query table" pops up. If there is already a lookup table for a lookup action, it will display in the "Property query table" when running BLOOKUPTABLE command.
