

COPYCLIP command

2055 GstarCAD MY /KW August 9, 2021 [CAD Commands](#) 0 893

The **COPYCLIP** command is used to copy the specified object to clipboard.

Command Access:

Menu : Edit > Copy

Command : COPYCLIP

Shortcut : CTRL+C ☞ Right click on the drawing area, click "Clipboard" option, and then select "Copy" option.

Command Prompts:

Select objects:

Function Description:

By using COPYCLIP command, the selected objects will be copied on clipboard. Contents on clipboard could be pasted on documents or drawing.

Note: if the cursor locates in the drawing area, it will copy specified object to clipboard; if the cursor locates in the command line or text window, it will copy specified text to clipboard.

Copy objects to clipboard, the information will be stored in all available formats; paste them to drawing, the information mostly kept file will be used.

Users could convert objects by using command COPYCLIP and PASTECLIP.
