

MLEADEREDIT command

2234 GstarCAD MY /KW April 15, 2022 [CAD Commands](#) 0 1207

The **MLEADEREDIT** command is used to add a leader to a multileader object or remove a leader from a multileader object.

Command Access:

Ribbon : Annotation > Leader > MLEADEREDIT

Menu : Modify > Object > Multileader > Add

Command : MLEADEREDIT

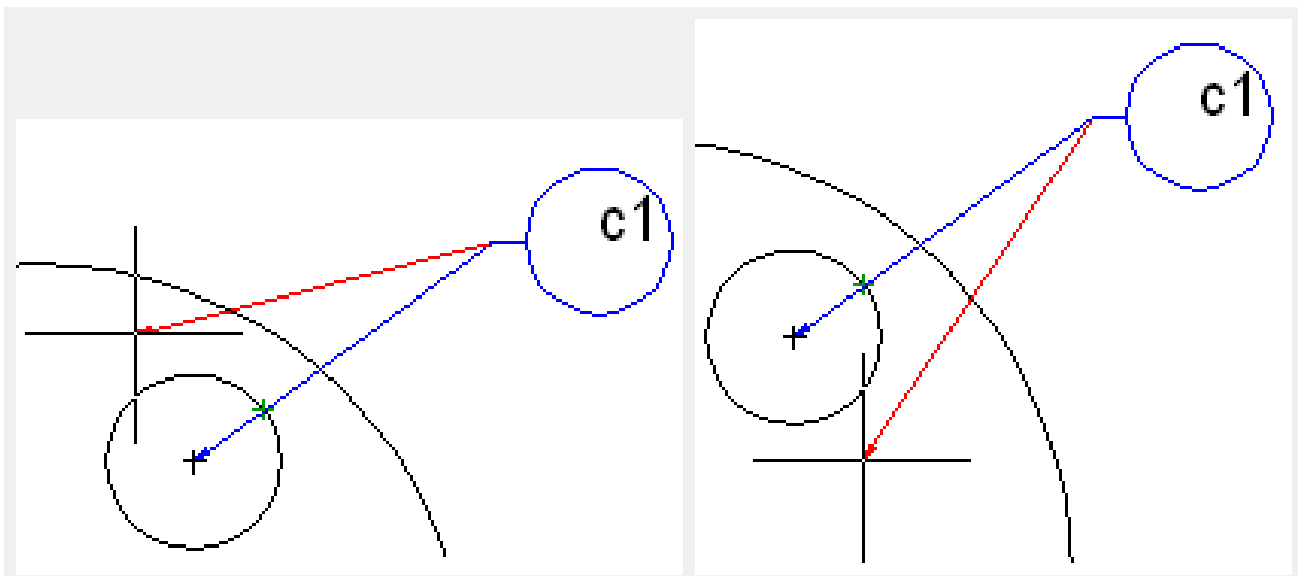

Command Prompts:

Specify leader arrowhead location or [Remove leaders]:

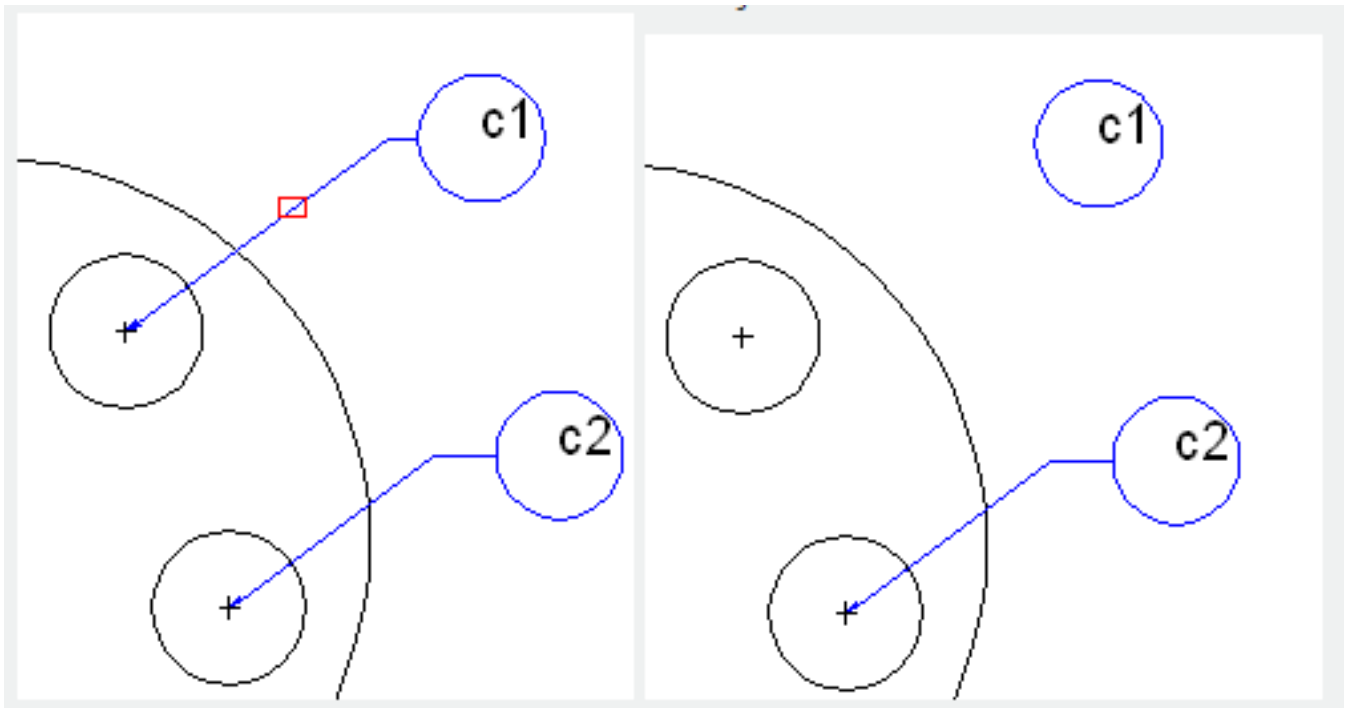

Relative Glossary:

Add leader:

Add a leader to a selected multileader object. The new leader will be added on the right or left of multileader according to cursor.

Remove leader: Remove leaders from selected multileader object.
