

MTEXT command

2247 GstarCAD MY /KW April 15, 2022 [CAD Commands](#) 0 997

The MTEXT command is used to create a multi-line text.

Command Access:

Menu : Text > Multiline Text...

Command : MTEXT

Command Prompts:

Current text style: "Standard" Text height: 2.5 Annotative: No

Specify first corner point:

Specify opposite corner or [Height/Justification/Linespacing/Rotating/Style/Width/Column]:

Function Description:

Users could change several text paragraphs to a single multi-line text and use "Text Formatting" to edit the text appearance, column, and boundary.

Inputting "-mtext" under command prompt, it will display other prompts without "Text Formatting" dialog box.
