

## **OPENSHEETSET command**

2262 GstarCAD MY /KW August 19, 2021 [CAD Commands](#) 0 812

The **OPENSHEETSET** command is used to open the existing Sheet Set.

### **Command Access:**

**Menu** : File > Open Sheet Set

**Command** : OPENSHEETSET

### **Function Description:**

In the Open Sheet Set dialog box, you can select a sheet set data (\*.dst) file to load sheet set information into the Sheet Set Manager.
