

PAGESETUP command

2268 GstarCAD MY /KW August 19, 2021 [CAD Commands](#) 0 1232

The **PAGESETUP** command is used to control page setup, printing settings, drawing size and other settings of new layout.

Command Access:

Ribbon : Export > Plot > Page Setup Manager

Menu : Application menu > Print... > Page Setup Manager

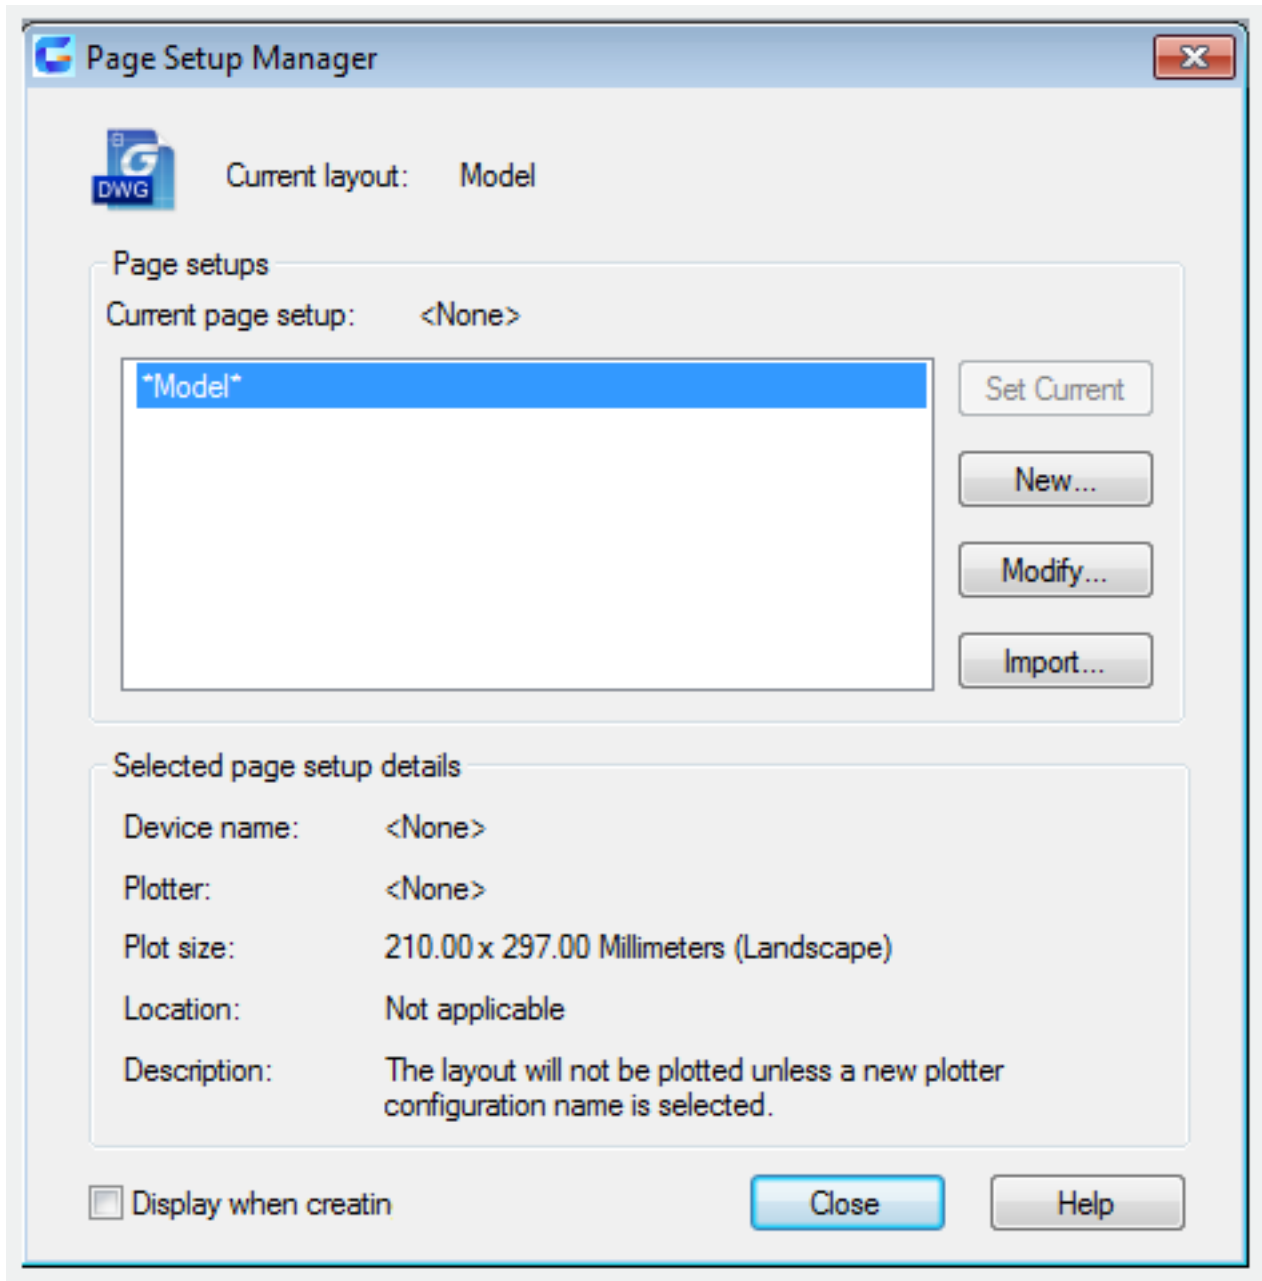

Menu : File > Page Setup Manager

Command : PAGESETUP

Shortcut : right-click the label of MODEL or named layout and select "Page Setup Manager..."

Function Description:

The "Page Setup Manager" is the group of settings that contains printing settings and other exporting settings of appearance and format. Those settings could be saved in drawing files, as well modified and applied on other layouts.
