

PNGOUT command

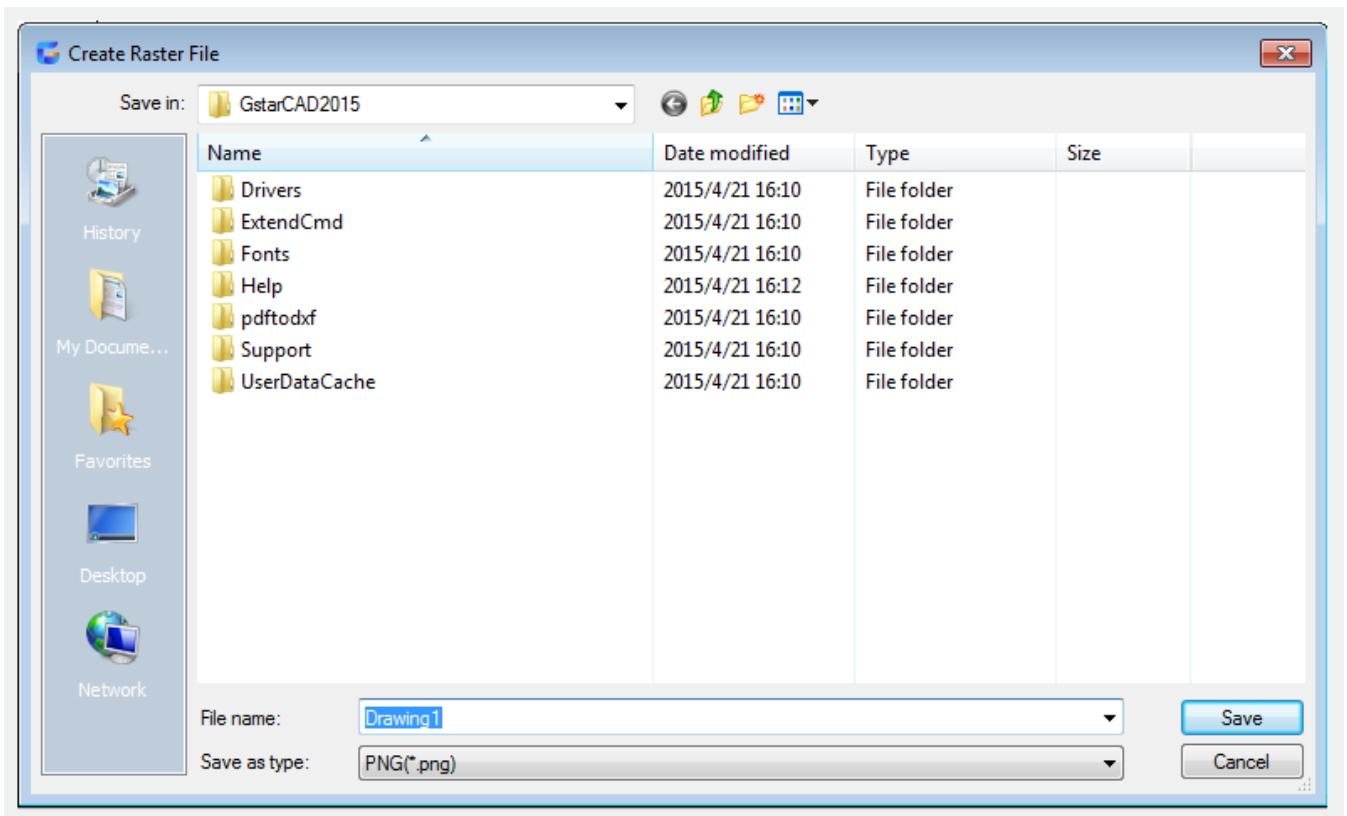

2286 GstarCAD MY /KW August 20, 2021 [CAD Commands](#) 0 826

The PNGOUT command is used to save selected objects to files in portable network graph format.

Command Access:

Command : PNGOUT

Function Description:

The created file could contain selected objects on drawing area.

Note: if the FILEDIA system variable is specified to 0, it will display prompts instead of dialog box.
