

# **PROPERTIES command**

2292 GstarCAD MY /KW April 15, 2022 [CAD Commands](#) 0 1811

The **PROPERTIES** command is used to control the existing objects properties.

## **Command Access:**

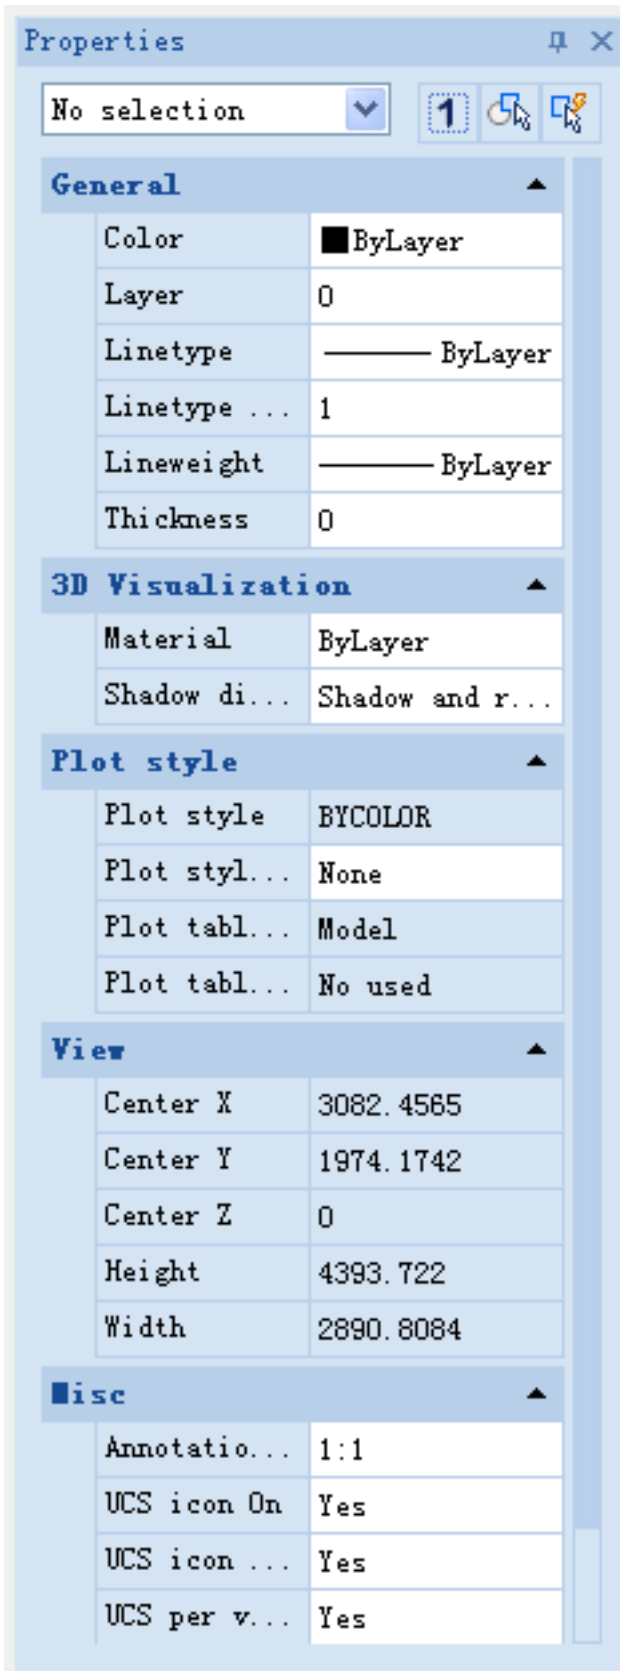

**Ribbon** : View > Palettes > Properties

**Menu** : Modify > Properties

**Command** : PROPERTIES

**Shortcut** : select the object and right click, click the "properties" options

## **Function Description**

The "Properties" palettes display properties of selected object.

If selecting multiple objects, it displays their shared properties.

If no object selected, it only displays common properties of current settings.

Uses could also edit properties of the third-party application that based on API standards.

There may be some common properties; the other properties are determined by types of objects.
