REGEN command

2322 GstarCAD MY /KW August 20, 2021 [CAD Commands](#) 0 1259

The **REGEN** command is used to regenerate the whole drawing from the current viewport.

Command Access:

Menu : View > Gegen
Command : REGEN

Command Prompts:

Regenerating model.

Function Description:

This command could regenerate the whole drawing from current viewport and recalculate all screen coordinates of objects. As well it could regenerate graph database index to optimize display and object selection performance.
