

STYLESMANAGER command

2371 GstarCAD MY /KW August 23, 2021 [CAD Commands](#) 0 842

The **STYLESMANAGER** command is used to display the plot style manager. Users could modify the print styles in the plot style manager.

Command Access:

Menu : File > Plot Style Manager

Command : STYLESMANAGER

Function Description:

Users could open the print style editor by double clicking STB files or CTB files. Double click one print style table (STB file or CTB file) to open the print style editor.
