

Set Model Space Viewports

2468 GstarCAD MY /KW September 2, 2021 [Workflow](#) 0 858

You can split the drawing area into one or more adjacent rectangular views, which are also called model space viewports on the Model tab.

For example, If you choose 2 or 3 viewports, you can set the arrangement of viewports: Three viewports: [Horizontal/Vertical/Above/Below/Left/Right]<Right>:

You can easily split and join the model space viewports. If you want to join two viewports, they must share a common edge of the same length.
