

# Save and Restore Model Tab Viewport Arrangements

2469 GstarCAD MY /KW September 2, 2021 [Workflow](#) 0 1083

You can save and restore model viewport arrangements by name.

Viewports and views don't need to be set up every time. Viewport arrangements can be saved and later restored with command [VPORTS](#) .

Available viewport arrangements can be listed, restored and deleted. You can insert a viewport arrangement, which was saved on the Model tab, into the layout tab.
