

# Control How Overlapping Objects Are Displayed

2490 GstarCAD MY /KW November 9, 2021 [Workflow](#) 0 943

Controls the displaying and plotting order of overlapping objects.

When you create a drawing, overlapping objects like [TEXT](#) , wide polylines ([PLINE](#)) or solid-filled polygons are displayed in the order in they are created. To change the draw order, you can use [DRAWORDER](#) or [TEXTTOFRONT](#) . You can bring all texts and dimensions to front by [TEXTTOFRONT](#).
