

Create Leader Text

2559 GstarCAD MY /KW November 9, 2021 [Workflow](#) 0 1067

With this function you can create a line that connects annotation to a feature

Create leader

You can create a leader with the [LEADER](#) or [QLEADER](#) command in any place of the drawing and you can set the format and control the appearance at the same time.

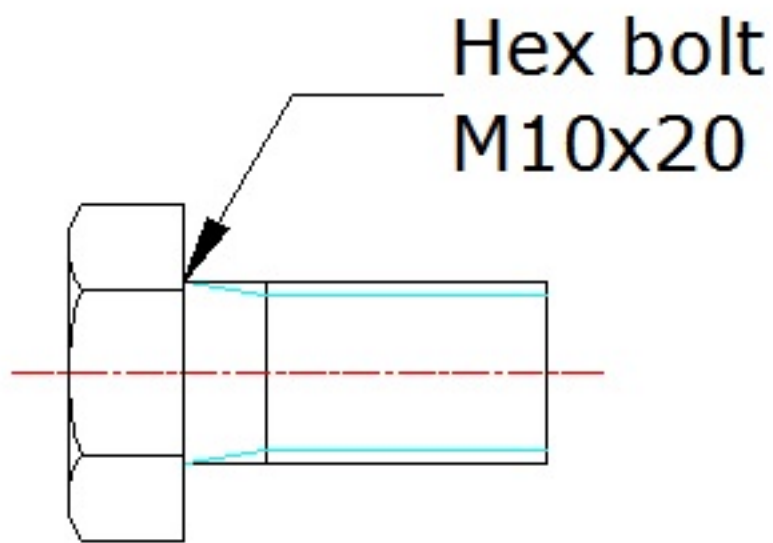

Add text to leader

There are two ways to create a leader text:

Type a text on the command line

Create a multiline text ([MTEXT](#)) with the Mtext Editor.
