

Control Dimension Geometry

2565 GstarCAD MY /KW November 9, 2021 [Workflow](#) 0 709

The appearance of dimension lines, extension lines, arrowheads and center marks can be managed

Control Dimension Lines

Controlling the dimension line properties like color, lineweight and spacing .

Control Extension Lines

Controlling the extension line properties like color, lineweight, overshoot and offset length.

Control Dimension Arrowheads

Controlling the arrowhead symbol's type, size and visibility in dimensions and leaders .

Customize Arrowheads

You can create your own custom arrowheads by defining a block.

To use custom arrowhead, select Use Arrow option in the list of arrowhead and specify the name of the block definition.
