

List Xref/Block Properties

2621 GstarCAD MY /KW November 10, 2021 [Workflow](#) 0 752

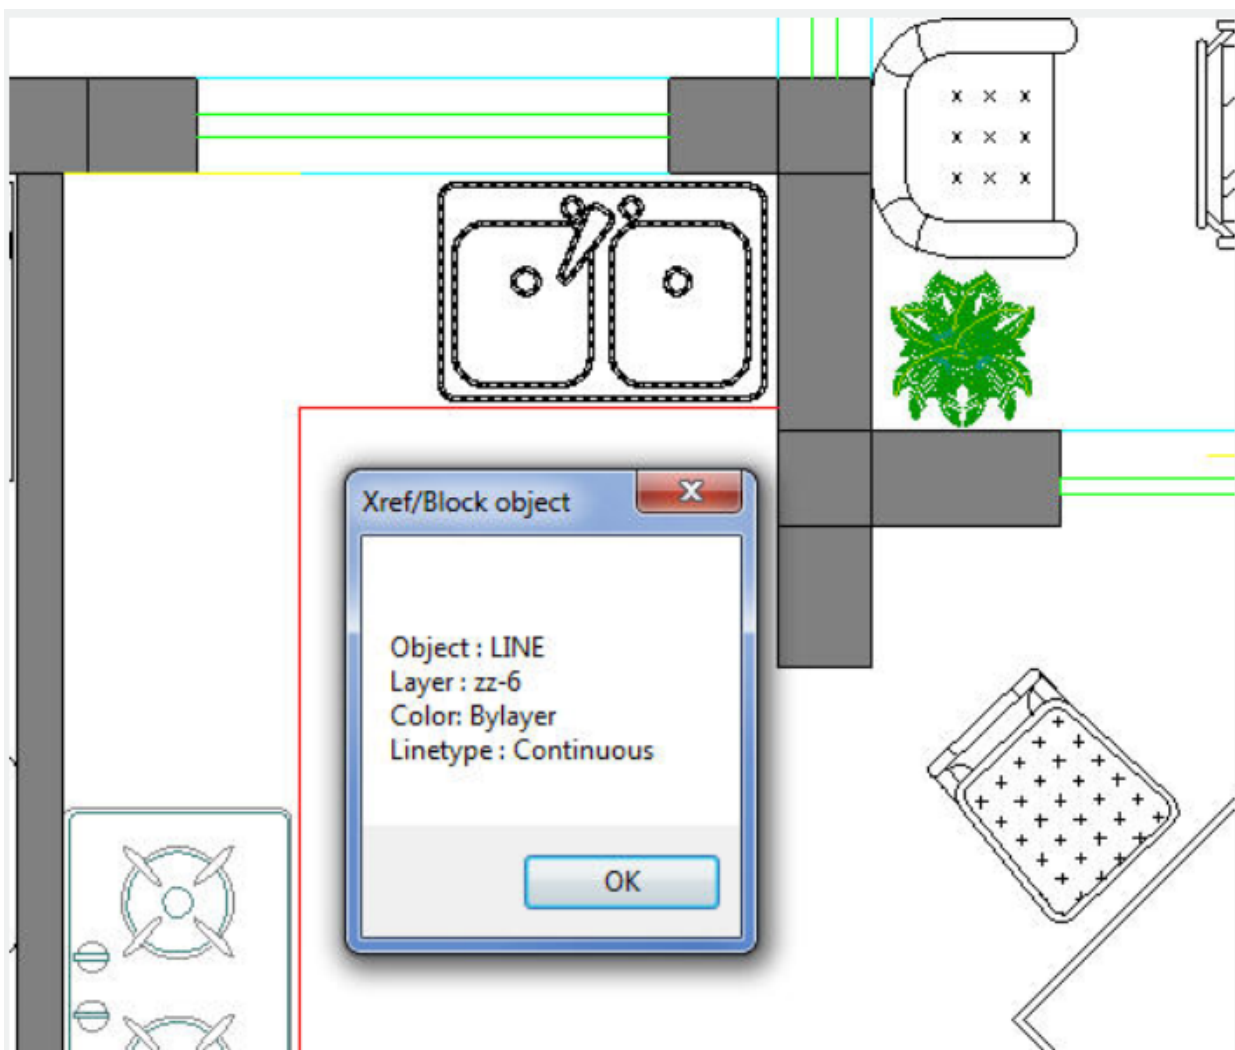

List the type, block name, layer name, color and linetype of a nested object in a block or an xref.

Menu : Express>Blocks>List Xref/Block Properties

Command Entry : XLIST

Command line prompts as follows :

Select nested xref or block object to list: Use an object selection method.

After selecting an external reference, the "Xref/Block object" dialog box will display attributes of specified blocks and xref, including object type, block name, color and linetype.
