Get Selection by Object Type

2667 GstarCAD MY /KW November 18, 2021 [Workflow](#) 0 758

You can use this function to multi-select objects with the same entity type in specified area.

Menu : Express>Selection Tools>Get Selection by Object Type

Command Entry : GETENTSEL

Operation steps:

1.Start the command.

2.Select object and system will take the specified entity type as target type.

3.Specify region.

4.System will bring all the blocks with same entity type in region selected area into the selection.
