

# Make Linetype

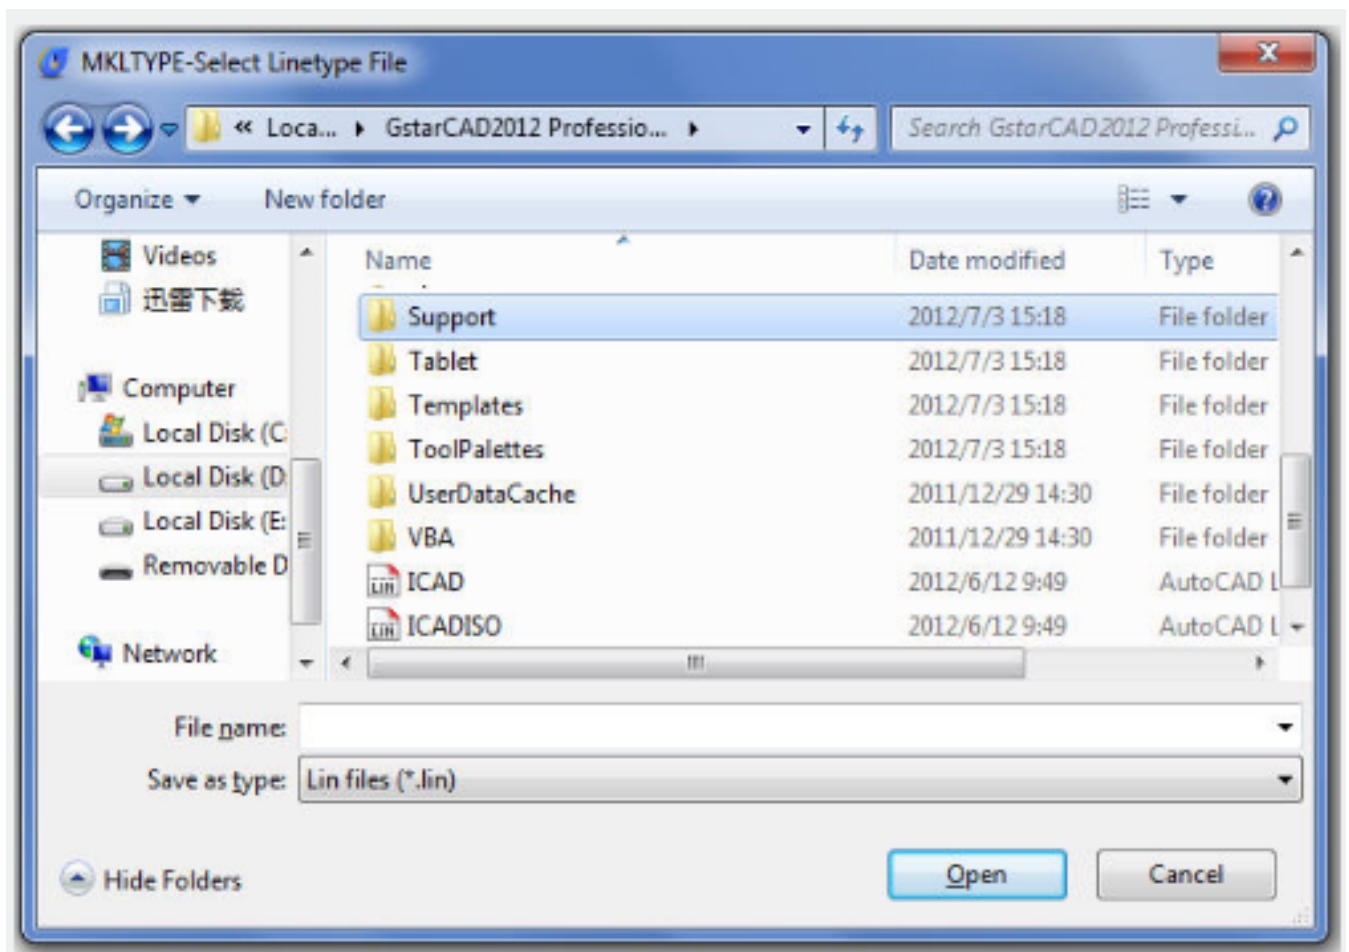

2690 GstarCAD MY /KW December 1, 2021 [Workflow](#) 0 927

Creates a linetype based on selected objects.

**Menu** : Express tools>Tools>Make Linetype

**Command Entry** : MKLTYPE

Once the command is started, the following window will be displayed. You can find the Line files (\*.lin) and apply them to the current drawing.
