

# Text Orientation Adjust

2707 GstarCAD MY /KW December 2, 2021 [Workflow](#) 0 1028

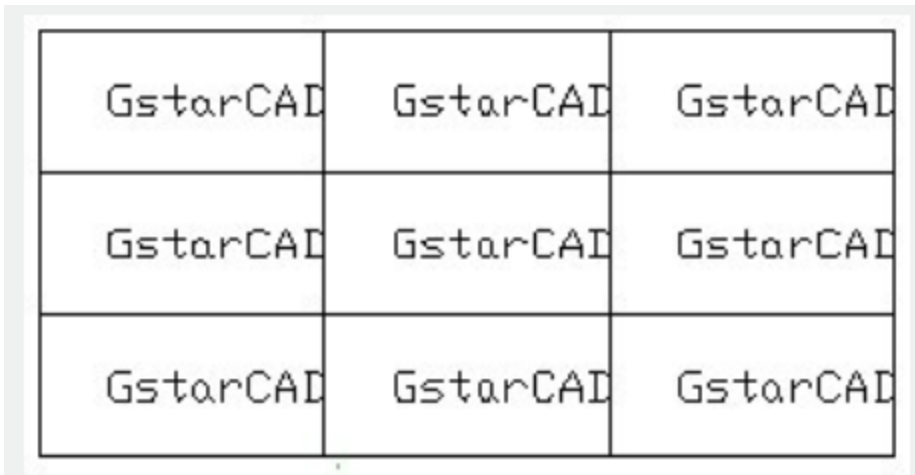

This function is used to adjust the alignment of the texts.

**Menu** : Express>Table Tools>Text Orientation Adjust

**Command Entry** : BGJS

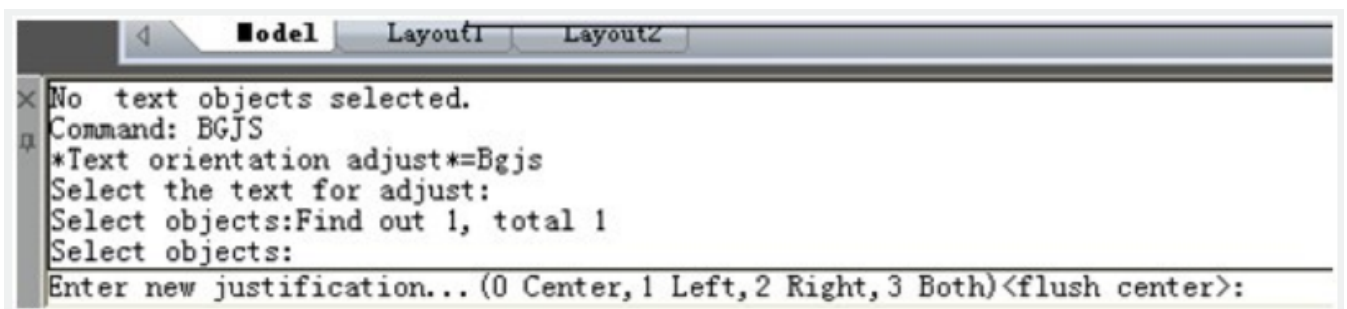

**Operation steps** :

1. Start the command.
2. Select the text for adjust.

GstarCAD	GstarCAD	GstarCAD
GstarCAD	GstarCAD	GstarCAD
GstarCAD	GstarCAD	GstarCAD

3. Enter and the command line will prompt the location mode, as shown below.

```
Model Layout1 Layout2
No text objects selected.
Command: BGJS
*Text orientation adjust*=Bgjs
Select the text for adjust:
Select objects:Find out 1, total 1
Select objects:
Enter new justification... (0 Center, 1 Left, 2 Right, 3 Both)<flush center>:
```

4. Here we input "1" to select left alignment.
5. The text you specified will align to the left, as shown below.

GstarCAD	GstarCAD	GstarCAD
GstarCAD	GstarCAD	GstarCAD

**Notice:**

1. This function can only orient and adjust the table text in the TABLE layer.
2. The distance to the table line using left alignment or right alignment has already been set by the program, if you think that the distance is not suitable, you can use the GstarCAD command to adjust the distance.
