

Dimreassociate command

2738 GstarCAD MY /KW April 15, 2022 [Workflow](#) 0 1370

Function Description:

This command is used to associate or reassociate selected dimensions to objects or points on objects.

Command Access:

Icon:

Menu: Dimension > Reassociate Dimensions

Ribbon: Annotation > Dimension > Reassociate Dimensions

Toolbar: /

Command: DIMREASSOCIATE

Alias: /

Command Prompts:

Select objects or [Disassociated]:

Select objects

When the defining point of selected dimension object doesn't associate with the geometry, the X mark is displayed. When the defining point of the selected dimension object associates with the geometry, the ☒ mark is displayed.

Disassociated

All of dimensions that have any disassociated defining point with geometries in the drawing will be selected to associate or reassociate one by one. You can press Esc to stop the command, but associations you have made will be kept.
